Click the button below to drop your details and make the most of our free onboarding support

[ONBOARD ME NOW](#)

We will push your products to the right buyers.

Once they've bought a product from your company, we will email them, asking to review your product.

After they have written a review, we will direct them back to your store on the Marketplace to further promote your company and purchase from you again.

We

To push customers to purchase on our platform, we offer products at discounted prices. We will pass part of our cost to the consumer at the point of sale, enabling the discount impacting you in any way. This means customers will be inclined to purchase from our Marketplace as the prices will be lower.

Grow Your Business

By joining our Marketplace, you

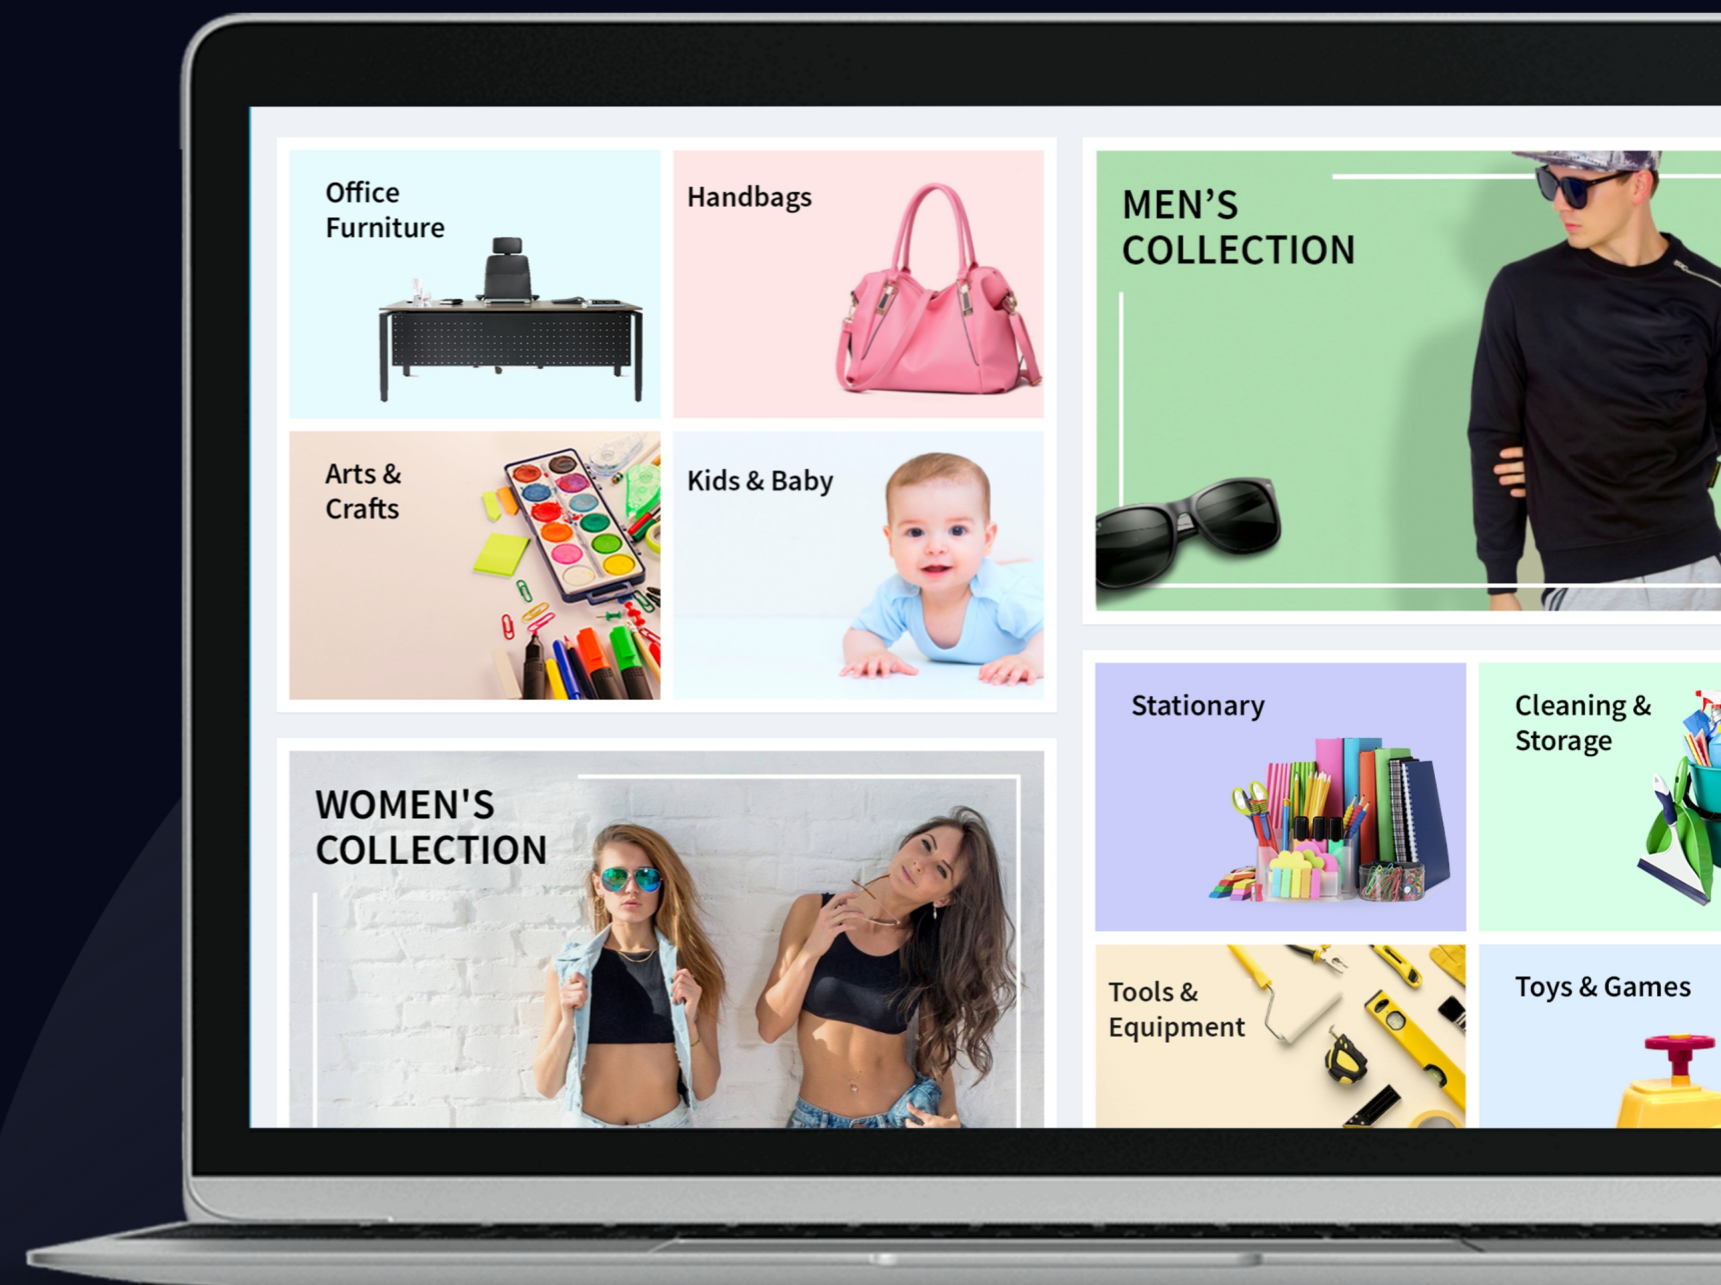

Real insight promotes real growth

Ask your customers the right questions to help you grow, improve and exceed their expectations.

The Future of online retail

Our client wanted merchants to push their products to the right customers and make them irresistible with the help of a smart matching system. Working on the world's first social review platform, we had to understand what customers want and what they are looking for. Through customer reviews and instant feedback, we created a system that could gauge what the current trends are. Merchants could further share their best reviews on the most popular social media platforms to generate leads and acquire new customers.

PROJECT GOALS

HestaBit

Easy product listing

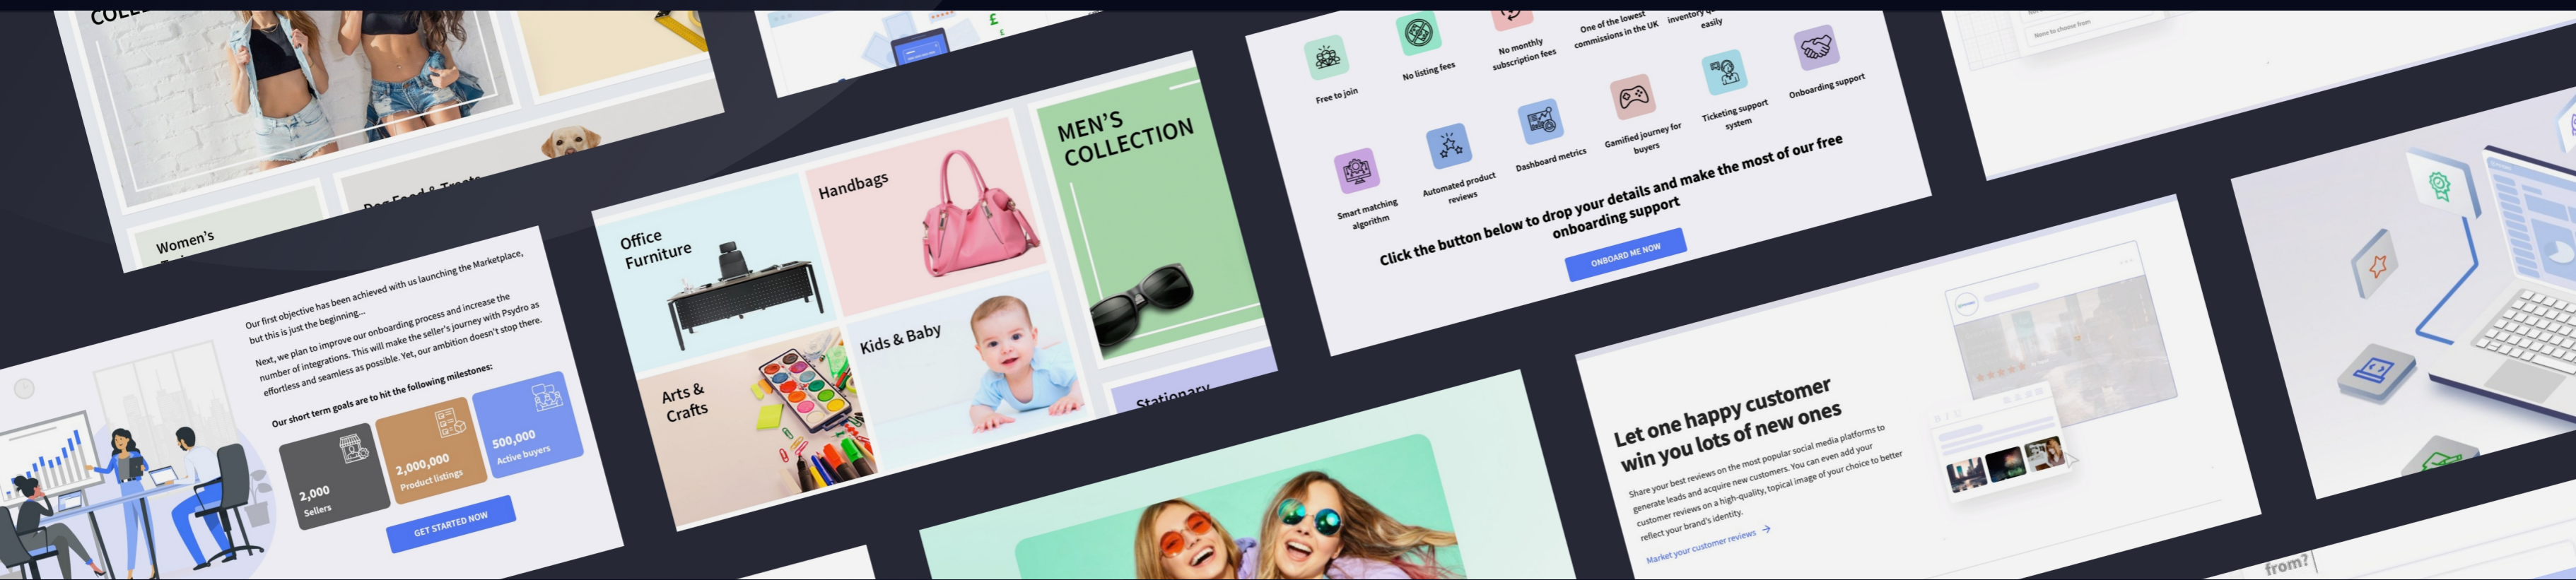

Enabling the merchant to be able to create products one by one and upload in bulk using CSV, XLS or with the help of integration with their IMS.

Coherent Integration

Integration with premium marketplaces, fetching products using their APIs and keeping it in sync with their inventory regularly.

Hiccup Free Refund

Managing refunds with payment gateways for both customers and merchants seamlessly.
